

Faculty & Staff Town Hall

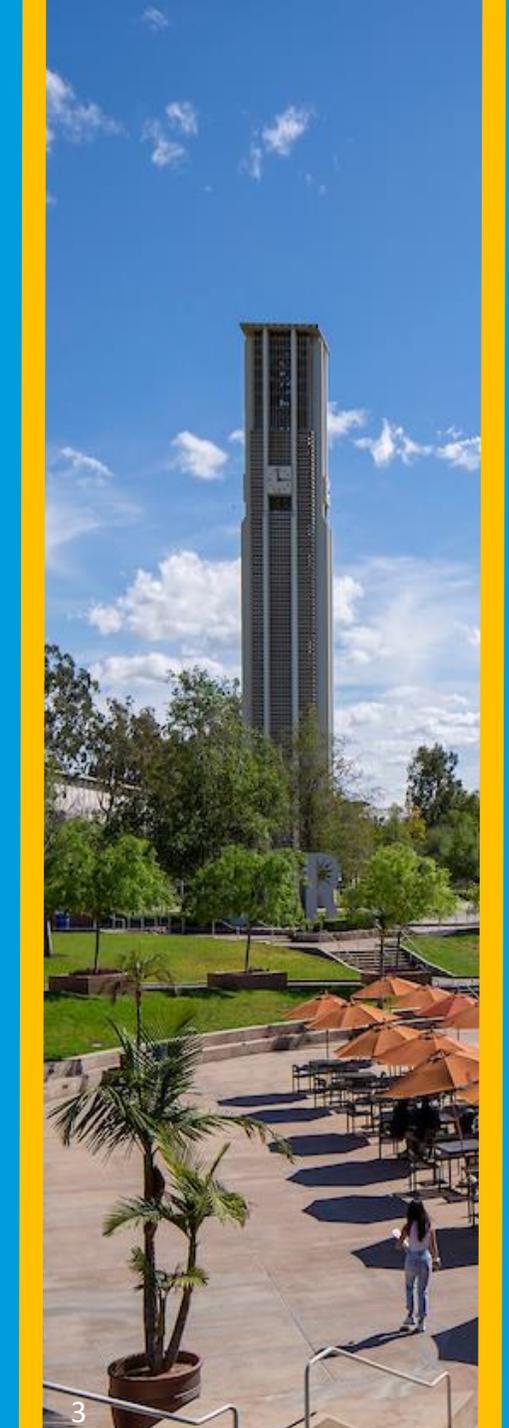

January 30, 2023

Agenda

UC Riverside has embarked on an important effort to update financial processes and systems across the campus. The program team hosts Town Halls as part of our efforts to prepare and educate the campus' faculty and staff on related changes and preparation activities.

This Town Hall is recorded and will be posted to the Impact23 website under News & Events ([Recorded Events](#)).

TOPIC	PRESENTER
Impact23 Program Updates & Department Preparation Tips	Gerry Bomotti & Bobbi McCracken
Audience Poll	Helen Kotke
Timeline & Testing	Josh Hoerger
Training Overview	Helen Kotke
Impact23 Summit	Laura Virgil & Asirra Suguitan
Question & Answer	Josh Hoerger

Impact23 Program

Modernizing UC Riverside's Financial Systems

The Impact23 program is a multi-year initiative to replace our financial system and transform how UC Riverside (UCR) transacts, develops budgets, tracks spending/revenue, and performs financial reporting.

The program is a collaborative project involving BFS, ITS, FP&A, Research (RED), our implementation partners, and campus stakeholders to implement a comprehensive suite of cloud-based solutions: **Oracle, Concur Travel and Expense, and Quali Sponsored Programs.**

What is Changing?

Modernizing UC Riverside’s Financial Systems

UCRFS – eBuy – eAward					iTravel	eCAF
 <p>Delivers financial applications designed to automate and streamline financial management and budget processes. This system has become a standard in the UC system (deployment July 2023).</p>					 <p>Provides an automated, customer-focused travel and expense solution (deployed 7/2022).</p>	 <p>Offers a research solution for pre-award (expected deployment 7/2023).</p>
Record to Report	Projects & Grants	Procure to Pay	Planning & Budgeting	Financial Reporting	Travel & Expense	Sponsored Programs
<ul style="list-style-type: none"> • General Ledger • Chart of Accounts • Banking • Asset Management 	<ul style="list-style-type: none"> • Contracts & Grants • Capital Projects • Related Receivables 	<ul style="list-style-type: none"> • Procurement • Payables • Payment • Supplier Management 	<ul style="list-style-type: none"> • Financials and Workforce Planning and Budgeting 	<ul style="list-style-type: none"> • Financial Reports and Analytics 	<ul style="list-style-type: none"> • Travel Requests • Travel Reimbursements • Travel Booking • Conversion to Corporate T&E Card • Card Program Request • Phase2 in July 2023 will expand the functionality 	<ul style="list-style-type: none"> • PreAward Requests • Grants Management <p>*Research Compliance Module <i>(separate from Impact23 program)</i></p>

View table of systems that are undergoing configuration or rework (rebuild or retrofit) to support the transition to the new Oracle financial system - [Program Scope | Impact23 \(ucr.edu\)](#)

Reasons for Change

- UC Office of the President has mandated adoption of a common chart of accounts by July 2023
- UCR formally evaluated options via an RFI in 2018, and all RFI responses recommended Oracle Cloud vs. other options, which included upgrading existing systems
- Campus last upgraded its financial systems in 2005, from a 1999 implementation, and UCR's current PeopleSoft version (8.8) is no longer supported as of May 2019
- Many of the business applications (e.g., eBuy, iTravel) are end of life and not feasible to update without impacting financial systems
- UCR campus departments need more robust reporting, and data analytics to best perform fiscal responsibilities

Program Objectives

- Minimally customized, configuration-driven financial system
- Future-proof solution to allow for feature and security upgrades, with continued vendor support
- Implement leading practices and business process transformations
- Deliver meaningful benefits to campus users
- Learn from the UCPath implementation
- Learn from other UC implementations

Decisions Informed by Inter-campus Collaboration

UCR has been engaging with other UC campuses since project inception

System Design and Testing

- Conservative approach to implementing the Project and Grants Module in Oracle
- Department Unit and Faculty testers included from SIT 2 and beyond

Financial/Faculty Reporting

- Leveraging and customizing other UC campus Oracle reports (i.e., reports that have been proven effective)
- Faculty portfolio reporting using GL & PPM segments (Flex Fields & POETAF)
- Include Financial Reports as part of the testing efforts
- Department Operational Reports available on Day 1

Training Model

- Develop training based on UCR role and associated job tasks (versus system modules)
- Working with departments and end users to define training curriculum and needed resources

Support Model

- UCR is planning and committed to a concierge-level service for users during deployment and stabilization for key priority areas.
- Support model and strategies are critical to have in place before deployment

New Procurement Support Role

Impact23 Deployment and Stabilization Support

- UCR is planning and committed to a concierge-level service for users during deployment and stabilization, and the procurement concierge will be on-going.
- The new **Procurement Concierge Relations** Manager is a central resource to support the campus community with procurement-related activities, including:
 - Supporting the campus community when facing challenges in procuring goods and services
 - Working with Central Procurement to fine-tune the processes for day-to-day operations focusing on enhancing the client experience
 - Develop and maintain training materials to support and help guide the campus community

Additional concierge support roles through stabilization, staffed by knowledgeable representatives, are under consideration for:

- *Budget*
- *Contracts & Grants*
- *Concur Travel & Expense*
- *Financial Reporting*

Procurement Preparation Tips

Take action on the procurement guidance below

1 PCard Utilization

- Empower departments by increasing PCard transaction limits to \$10K for all cardholders effective 2/1/2023
- Identify PCard program personnel. A minimum of two cardholders are recommended in each unit to assist with purchasing goods and services
- Utilize PCard on all department unrestricted purchases under \$500
- Utilize PCard on other unrestricted purchases between \$500-\$5,000 whenever possible

2 Purchase Order Standards

- Utilize UC Supplier Agreements when possible. Pre-negotiated agreements will expedite orders.
- Limit DAPO and purchase order change order requests between now and July 1, unless requested by Accounts Payable. Older orders with multiple change orders present conversion challenges
- Do not add negative lines to any DAPO or PO for any reason
- Do not process FAU change orders (this will interfere with automatic conversion); use the applicable cost transfer application as needed

Impact23 Change Impacts

The following changes will be shared across all stakeholder communities.

1 The new Chart of Accounts (COA) will replace the current Full Accounting Unit (FAU)

2 Pre-Approval Workflows. In the current state, pre-approvals are manual and non-consistent. In the future state, the approval workflow will be built into the system design

3 New reporting framework will improve visibility into transactions, status, and overall health of financial processes.

4 General Ledger will have summary-level data. Oracle modules, or subledgers, will house the transaction and reporting details.

5 Supplier Strategy will move to a university-wide strategy to consolidate spending

6 Financial Planning and Budget occurs in a separate module and moves from a transactional system to an analytical system

Department/Org Preparation Tips

Impact23 Go-Live

1

Inventory and Convert all FAUs

- Use the New Golden Tree Viewer to convert FAUs to the new COA
- Share COA chart strings with your teams

2

Adopt T&E and PCards

- T&E Card transactions import automatically into Concur Travel and Expense
- PCard limit increase to \$10K to empower departments to expedite their purchases and while minimizing the challenges of transitioning to Oracle.

3

Approvers – Monitor Transactions Closely

- Correct accounting errors and inconsistencies upfront
- Educate your fiscal staff on COA/coding transactions to prevent rework and cost transfers

4

Stay Current on Resources

- Attend the Impact23 Summit virtual conference March 6-27
- Attend readiness events and take formal training

5

Local Committees and School/College Tiger Teams

- Create local forums to share best practices, coordinate efforts, and connect groups now
- Coordinate Functional Workgroup participants and Extended Testers to form Tiger Teams that can lead, guide, and perform ad hoc department support for users upon go-live

Chart of Accounts

- A new COA-based **Golden Tree Viewer** is now available in pre-release!
- Visit the Impact23 website or <https://impact23.ucr.edu/golden-tree-viewer> to access the new tool
- All searches are performed against COA codes and their descriptions
- Transactions will post at the lowest level of the segment value hierarchy (posting level)
- This is pre-release software, and updates are still being made to the functionality, including bug fixes
- COA segment values are sourced from a current Oracle TEST instance, and COA values are still being added and updated
- Learn more about [UCRs new Chart of Accounts \(COA\) & POETAF](#)

The screenshot displays the UC Riverside Golden Tree Viewer interface. At the top, the logo for UC Riverside and the title 'GOLDEN TREE VIEWER' are visible. A navigation bar includes a search field labeled 'Search Fund', a 'Support' dropdown, and an 'Export' button. Below the search bar, a horizontal menu allows users to filter by Entity, Fund, Activity, Account, Function, Program, or Project. The main content area shows a hierarchical tree of COA segments, such as '1000A - Unrestricted' and '2000A - Restricted Expendable'. Annotations in yellow boxes provide instructions: 'Search for a chart field by code or description - Ex. Alumni' points to the search bar; 'Click [i] for segment definitions' points to an information icon; 'Download results to excel' points to the Export button; and 'Drill up or down the hierarchy using "/>

Change Readiness Survey #3

Winter 2023 Assessment

- Email invitation to the survey will be sent as a follow-up to this Town Hall
- Helps us understand and support people readiness.
- Trends over time let us know if our approach is working, and where we need to adjust
- Link to Survey:
https://ucriverside.az1.qualtrics.com/jfe/form/SV_9HVkfEQhEcCZsSW

For each statement give your response on a scale where 4 = Strongly Agree and 1 = Strongly Disagree. Each statement needs to be completed for the survey to be submitted.

	4- Strongly Agree	3- Agree	2- Disagree	1- Strongly Disagree
I am aware that Impact23 is a local change and UCR is responsible for the design of the solution	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I feel informed about the business changes that are about to take place on our campus	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I am prepared to embrace any new changes at UCR and look forward to adopting something new	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

What additional resources & efforts
would you like to see before go-live?

System Integration Testing (SIT)

SIT 2 In Progress: SIT 2 launched January 3 and expanded to include additional campus testers, including faculty, as identified through the Extended Tester nomination process.

SIT 2 Objective: Expand end-user exposure to Impact23 systems early to ensure each major unit has resources with foundational COA and Oracle workstream knowledge before UAT.

Extended Tester Activities:

- Participate in testing cycles
(Note that testing activities start at different times for different workgroups, including some not starting until March)
- Inform the development of communications and training
- Exposure and input into training before wider campus roll-out
- Act as a front-line resource for the unit's Impact23 users (post go-live)

Mock 3 UCR Data Conversion Cycle: The third mock data conversion is in process, parallel with SIT 2 activities.

Learning Paths

Meet diverse learners' needs by providing learner-centric learning paths

How it Works

Libraries are setup within the UC Learning Center indicating persona-based learning paths which build on each other to instruct users at the right level according to their role.

Foundational Training

- Financials & Budget Introduction
- Chart of Accounts
- Reporting Tools & Dashboards
- Financial Boundary Systems & Tools
- ★ Reporting Tools & Dashboards Workshop

Foundation within Learning Path

Instead of the Foundational Training library, the “Financial Managers & CFAO” and the “Faculty, Researcher, & PD/PI” personas have specific details tailored from the foundational training incorporated into their courses as applicable

Persona Based Learning Paths ★

Instead of the Foundational Training library, the “Financial Managers & CFAO” and the “Faculty, Researcher, & PD/PI” personas have specific details tailored from the foundational training incorporated into their courses as applicable

Ongoing Training

Continued training and support through webinars and future courses will be provided- e.g., EPM budget development, Datawarehouse, and SAA Training

Future State

Virtual Instructor-Led Workshops are incorporated into the learning paths to facilitate hands-on practice within the systems using specific case studies.

Training metrics

- Training metrics will be established to evaluate the training program's effectiveness and learner engagement
- Training metrics help inform in many areas, including knowledge and skills development, end user readiness and user satisfaction

Suggested training metrics for each course include:

- Percent completion
- Average learner assessment score
- Retake rate for learner assessments
- Confidence with system
- Oracle production, user performance data (e.g., error rates)

High-Level Training Timeline

- **Question:** When can we expect to receive training?
- **Answer:** Foundational eLearning for Chart of Accounts and Oracle is expected to begin rolling out as early as April 2023

JOIN US AT THE IMPACT23 SUMMIT

VIRTUAL CONFERENCE

Gain exclusive insight into new Impact23 financial management systems and business processes during topic-driven sessions, system demos, panel discussions, expert chats, interactive brain breaks, and more!

Making an Impact

The Impact23 Program: Modernizing UC Riverside's Financial Systems

Countdown to Launch
July 1, 2023

IMPACT23 SUMMIT

The Impact23 Summit directly responds to the UCR community's request for robust knowledge-building and learning opportunities. This virtual conference serves as a precursor to formalized training by sharing more in-depth knowledge of Concur, Quali, Oracle Financials, Oracle Budget, Boundary Systems, and Financial Reporting by showcasing the most frequently used transactions and critical changes.

➤ Session Types

- **Session** – 45 min topic-driven session to walk through new concepts, system demos, and discuss questions as they arise
- **Brain Break** – Fun learning reinforcement activities like trivia, games, etc.
- **System Demo** – Informal preview of a process in the new system
- **Panel** – Ask the experts questions from that week's sessions

➤ Resources:
