Concur Travel and Expense
Role Provisioning
### Attention!
Effective July 3rd, all Concur Phase 1 routing in EACS will be deleted. Department SAAs are required to establish new routing assignments.

Changes to Concur Roles

With the expansion of Concur to non-travel reimbursements and procurement card distributions, changes to Concur roles were necessary to address concerns raised by users and reduce complexity.

The new roles will apply to travel requests, travel reimbursements, non-travel reimbursements, and procurement card distributions.

The changes should:

• Simplify the experience for employees requesting reimbursement
• Ensure explicit routing when Previewers are defined
• Reduce approval delays when a designated individual is out of the office

To accomplish these improvements, SAAs will be required to perform updates in EACS. Additional guidance will be provided.

Concur Phase II roles are currently unavailable in EACS for provisioning.
New Concur Roles

- **Concur Users** can process Concur Request and Expense Reports for travel and non-travel reimbursements.

- **Concur Delegates** are optional for travel booking and transacting non-travel reimbursements (acting on another user’s behalf). Additionally, Concur Delegates are assigned to a Concur User, not an accountability structure, which may impact those who prepare for multiple accountability structures. Concur Delegate assignments are limited to 250 per user.

- **Financial Previewer** role(s) are optional. If defined, requests will be explicitly routed to this role before proceeding to the Financial Approver. Concur routing allows for the assignment of only one Financial Previewer per Accountability Structure, who will be listed as the previewer for Concur routing.
New Concur Roles

- **Financial Approver** is a required routed role by Accountability Structure. Concur routing allows for the assignment of Financial Approvers per Accountability Structure, who will be listed as the Financial Approvers for Concur routing, including for T&E Card and PCard issuance requests.

- **Approver Delegate** users act as a delegate Financial Previewer and/or Financial Approver on behalf of the respective approver. Regardless of the Concur User or Accountability Structure(s) involved, the Approver Delegate has the authority to perform the respective approvals.
  
  - This approach addresses delays when the Previewer and/or Approver is out of the office when the delegate role is assigned.
New Concur Roles

- **Department Head** is required to be designated in EACS
  - Restricted to one per accountability structure.
  - Approves Relocation Expense Reports.
  - Financial Approvers, Department Heads, and Executive Approvers must be distinct users.

- **Exceptional Approver/Delegate**—Required at the ORG level
  - **Delegated Exceptional Approver** users would require an understanding of how to handle an offline approval of a true exception, knowing they serve as a proxy.
  - Restricted to one per Org

- **PCardholder** (Company Billed Statements (CBS) User)
  - Users with the PCardholder role will have access to distribute PCard expenses in Concur.
  - Same approval flow with optional **Financial Previewer** and required **Financial Approver** will be used to approve distribution of PCard expenses.

- **Department Card Administrator (DCA)**
  - Delegate of the PCardholder and can distribute PCard expenses in Concur on behalf of the PCardholder.
