Overview

UCR recently updated our campus financial system. To improve security and confidentiality of individuals and others receiving payment from UCR (i.e., payees), payees are asked to securely provide information required to issue a payment. This guide offers detailed instructions on how to create and manage profile information for a payee that is not providing procurement related commodities (also known as a non-purchase order (PO) suppliers) nor employment related services, such as non-employee payees receiving stipends, refunds, reimbursements, etc. Please keep in mind that all data and values presented in this guide are for training purposes only. When using the guide, for security and confidentiality purposes, payees are asked to update their profile with their personal information in all relevant fields. The Supplier Name must exactly match the name associated with the tax identification number (payments must be to legal name, tax withholding and reporting (if applicable) must be against legal name, ensuring unique supplier records, etc.).

Steps to Take

Topic 1: How to access the Oracle Supplier Portal

This process outlines the steps required for a user that is not part of the UCR organization to log in to Oracle. When a UCR campus department needs to initiate a payment to you, they will request your email contact information and initiate a request to UCR’s Accounting Office. Next, an email will be sent from UC Riverside to you, the Payee. From there, several subsequent steps need to be completed to create a user account and password to successfully access the Oracle system and update your payee information.
